Testing Project with Selenium

Project for testing

A web project **Sports Corner** is tested. The GitHub repository of the project is at the link: https://bit.ly/2JzqWaC.

Test Case Design Documentation for testing

A document is prepared for designing the test cases to do testing. The document is available at the link : https://bit.ly/2MkInN7

Tools for testing

The code for testing is written using **Java** programming language on **Eclipse IDE** to do the testing with **Google Chrome** on a **Windows OS PC**.

It is to be noted that requirements for running the project **Sports Corner** should be met before testing is carried out.

For testing purpose, the following elements are required.

- Language specific client driver of Selenium for Java

  > *Can be downloaded from the link: https://www.selenium.dev/downloads/*

- ChromeDriver - WebDriver for Chrome

  > *Can be downloaded from the link: https://chromedriver.chromium.org/*
